

HOMICIDE AND INJURY

Every day in the US, more than three women are murdered by their husbands.

Almost one-third of female homicide victims that are reported in police records were killed by an intimate partner.

In 70-80% of intimate partner homicides, no matter which partner was killed, the man physically abused the woman before the murder.

Less than one-fifth of victims reporting an injury from intimate partner violence sought medical treatment following the injury.

Intimate partner violence results in more than 18.5 million mental health care visits each year.
